Non-GMO Statement

We are pleased to declare to our valued customers that our products:

- Helichrysum italicum Essential oil*
- Helichrysum italicum Hydrosol*

were produced using traditional methods. No genetically modified organisms (GMO's) or transgenic breeding methods were used in the production. Furthermore, all our seedlings were produced from handpicked seed from wildflowers of Helichrysum italicum.

Auro Oleum is proud to offer organic products certified through BIOTEHNICON, fully accredited inspection and certification organization.

What does all of this mean to you, our customers? When you order a bottle of our essential oil you can feel confident in knowing that your purchase is helping to conserve our precious natural resources and reducing environmental pollution.

Some of these standards include:

- No GMOs: Genetically Modified Organisms are prohibited in organic products. This means that an organic farmer can't plant GMO seeds and an organic producer can't use any ingredients containing GMOs.*
- Clean soil: The land where the products are grown must not have had any prohibited substances applied to it for at least 3 years before the harvest of an organic crop. Synthetic fertilizers, sewage sludge, irradiation, and genetic engineering may not be used.*
- No harmful pesticides: Crop pests, weeds, and diseases are controlled primarily through physical, mechanical and biological efforts. If for some reason these methods are not working, a biological, botanical or synthetic substance that is approved on the National List may be used.*
- All organic, all the way: Operations must use only organic seeds and other planting material. When you purchase a certified organic product, you are also helping to conserve biodiversity, ensuring that our natural landscapes and their ecosystems are maintained and intact for generations to come.*

At Auro Oleum, we are committed to supporting these conservation efforts and to be able to offer our customers certified organic options.
